

Aborted Baby Fetal Cells:

Most of the injections are either created, tested, or developed on fetal cell lines created by aborted babies.

- Cell line WI-38 (1962 – [23+ abortions](#); WI-26 (20 abortions) WI-44 (38 abortions)) means Wistar Institute, **38th** fetal sample; all babies used for cell lines are perfectly healthy, or they won't be considered; and the abortion is elective, or in some instances, forced. It's not just a few: over 80 abortions were involved with rubella vaccine production, for example.
- Some other cell lines are MRC-5 (1966 – [5 abortions](#) RA27/3 (1965 - [67 abortions](#)), PER C6 (2001 – “immortalization” caused tumor formations), [Walvax-2](#) (2015 – 9 abortions, [live organ retrieval](#)), IMR-90 & IMR-91 (1970s), HEK-293, more coming all the time; read about the US vaccines derived from abortions: <https://www.cohealthchoice.org/2020/01/23/human-fetal-cell-lines-01/>
- History of abortion for vaccine purposes: “*Experiments were being performed on near-term alive aborted babies who were not even afforded the mercy of anesthetic as they writhed and cried in agony, and when their usefulness had expired, they were executed and discarded as garbage.*” <https://cogforlife.org/2012/06/13/polioperversion>

Every “vaccine” likely to be used in the US utilized aborted fetal material: <https://soundchoice.org/vaccines/covid-19-vaccine-chart/>

Chart showing all treatments in development and the cell lines used: <https://cogforlife.org/wp-content/uploads/CovidCompareMoralImmoral.pdf>

If, murder is wrong and forbidden by God;
 and, Abortion is committing murder of a child;
 and, Vaccination development involves harvesting tissue samples from living babies just before killing them;
 and, Receiving a vaccination is associated with abortions and in some cases is injecting infant tissue into a person's body;

(There are a number of fetal cell lines in existence right now, there's WI-38, MRC-5, HEK-293, PER.C6)

Then, receiving a vaccination is morally and ethically wrong.

Anyone who takes God and the Bible seriously must consider the moral and spiritual consequences of receiving a vaccination.

Have you had the conversation below where you asked these questions to a work colleague or friend lately?

- Q. Did you take the Covid vaccine?
 A: Yes.
 Q. Do you know that you can still get Covid?
 A. Yes.
 Q. Do you know that you can still spread Covid to others?
 A. Yes.
 Q. So you know that you still have to wear a mask (or two!) and social distance?
 A. Yes.
 Q. Then why did you take the vaccine?
 A. [Silence]
 Q. Did you take the vaccine because you knowingly wanted to modify your DNA?
 A. I did not know that. I did not read up on the vaccine before I took it.
 Does it really do that???

Moral of the Story: When you are given the right to choose, educate yourself so that you can choose wisely.
ALL choices have consequences. –Lin Wood

The “Covid Vaccine”

What is mRNA technology?

Instead of inoculating people with inactive viruses, mRNA technology tricks the body into making the viral protein itself which, in turn, triggers an immune response.

Because the mRNA is not designed to enter the nucleus of the cells, where the DNA is, it is not thought by many to be able to alter DNA. (However, this has been the goal with previous vaccines, as well, but resulted in human fetal cell DNA being found in them, anyway: <https://childrenshealthdefense.org/news/new-data-shows-aborted-fetal-cells-in-vaccines/>)

The mRNA is specifically designed to trigger only an immune response to the virus's spike protein, which is just one component of the viral membrane and enables the virus to invade our cells.

According to Dr. Fauci, this isn't meant to stop infections, nor to stop transmission of the virus; it is simply designed to prevent symptoms serious enough to land a person in the hospital. By that definition, the injection is a prophylactic treatment, and should be listed as such, along with all the other treatments available.

This is not medically nor legally a vaccine. It's a medical device designed to stimulate the human cell into becoming a pathogen creator. However, the term "vaccine" is used in order to use the public health exemptions in order to get it forced and paid with public funds. <https://www.bitchute.com/video/6LYagqLH5SGa/>

This has never been licensed for human use in vaccines before, and is only now allowed under the Emergency Use code. It's not been approved for regular use under the FDA.

The testing has been rushed, with no adequate design, length, or scope. The blind studies, where one group has gotten the placebo, have been short term, and the long-term effects are not able to be studied, as the placebo group is now able to get the vaccine, too, creating no difference in the groups, and plausible deniability for any long-term side effects.

Vaccine makers are shielded from liability; ie, they have nothing to lose if it harms you, and everything to gain by pushing universal vaccination.

IS IT DANGEROUS?

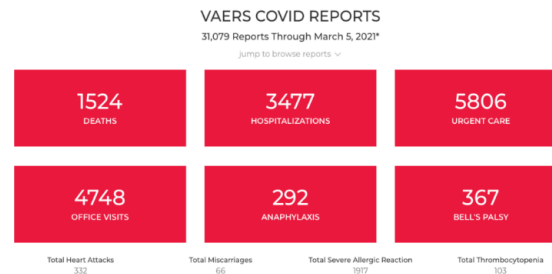

Animal trials resulted in pathogenic priming, which the NIH found likely contributes to serious and critical illness and mortality: https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7142689/?fbclid=IwAR0K3TP_YCi7HDdKs1OOWExYUxGxhRSvbXNLHTtrxiVLI8FFisYEE5_MIHFA

Thus, animal trials have been skipped for "warp speed" distribution, even though the study above concludes it should be done, and animal trials for previous coronavirus strains resulted in the trial animals dying. <https://humansarefree.com/2021/01/dr-lee-merritt-animal-studies-mrna-technology-all-animals-died.html>

Besides death, other side effects include:

- Study confirms infections INCREASE in two weeks after injection (the vaccine is creating an outbreak of infections? This happens with sloughing of the virus in other vaccines) <https://www.thegatewaypundit.com/2021/03/british-government-study-confirms-covid-19-vaccine-risk-infections-increase-fortnight-jab/>
- Allergic reactions: Even the "inactive" ingredients may cause problems, specifically allergic reactions: aluminum, thimerosal, gelatin, residual DNA, undisclosed contaminants, and polyethylene glycol, polysorbate 80. <https://childrenshealthdefense.org/defender/inactive-ingredients-covid-vaccines-allergic-reactions/>
- "There is a possibility of 'homologous recombination' where the residual DNA that's being injected into your body can kind of line up with the DNA that it corresponds to in those individual cells, and then there's some enzymes that can come along and they can swap those two pieces out. So, you end up losing your actual DNA and having the DNA from the aborted fetal cells incorporated into your cells." -- Vaccine researcher Pamela Acker <https://www.lifesitenews.com/opinion/a-hill-worth-dying-on-expert-explains-how-aborted-baby-cells-taint-covid-vaccines>

Voluntary reaction reports from Covid "Vaccine":

SAFETY & EFFECTIVENESS CONCERNS

- COVID-19 vaccines are under Emergency Use Authorization (EAU); they are not FDA licensed or approved. Clinical trials are still underway.
- As of March 5, 2021: 31,079 Adverse Reactions, 3,477 hospitalizations, & 1,524 deaths have been reported to the U.S. Vaccine Adverse Event Reporting System. This is a passive system that suffers from under-reporting. See OpenVaers.com
- Safety concerns include but are not limited to:
 - Anaphylaxis & CARPA
 - Pathogenic Priming
 - Viral Immune Escape
 - Autoimmunity
 - Thrombocytopenia (ITP)
 - Heart failures by TNF-α
- "Immortalized" cell lines are often given cancer promoting genes that disrupt the function of cancer suppressor genes;

Liability-Free

The Public Readiness & Emergency Preparedness (PREP) Act shields entities & individuals involved in the development, manufacture, testing, distribution, administration, & use of COVID-19 vaccines from liability for injuries & deaths, arising out of, relating to, or resulting from administration or use of COVID-19 vaccines.

Unnecessary

- Safe & effective nutrient & off-patent drug therapies exist that can greatly reduce risk of infection & reduce risk of severe disease, even as the virus mutates.
- Low Vitamin D levels are directly related to susceptibility & disease severity.
- Ivermectin prevents infection & treats symptoms of disease at all stages.
- Ivermectin & Hyperbaric Oxygen are promising for treating "long-hauler" symptoms.
- The overall recovery rate from COVID-19 infection is greater than 99%, with the majority of people experiencing no, mild, or moderate symptoms. A positive PCR test result does not always mean someone is sick or contagious.
- Studies are showing that natural immunity to COVID-19 is long-lasting.
